

Raft Building Risk Management Plan

Lutanda Yarramundi

School: _____ Year: _____ Dates: _____

Program: _____ Supervising Staff: _____

Activity Context

The archery range at Lutanda Yarramundi is located next to River Lodge on the left end of the property. Archery is fun way to challenge participants in their confidence, decision-making and hand eye co-ordination. Participants are instructed on how to hold, load and fire a re-curve bow safely an effectively.

Leader to Participant Ratios

For groups 13yo and above:
1 Activity Facilitator to 17 participants

For groups 8-13yo:
1 Activity Facilitator to 17 participants

For all groups with participants under 18yo:
Group is required to have a supervising adult present

Higher ratios may be required depending on differing group requirements or circumstances

Participation Requirements

Minimum Age: 8 yo

Restrictions may apply under differing circumstances

Equipment

Participants are required to wear/have the following:

- Sun protection (sunscreen, shirt etc.)
- Closed toe footwear
- Adequate water
- Any medication required

The following personal protective equipment is provided and must be worn by participants using the course:

- PFD (for everyone who enters the water)

Activity Facilitators

Activity Facilitators are trained and signed off as competent to run activity by Activities Manager

Activity Facilitators hold current first aid and CPR certificates

Emergency

- is conducted on site and first aid is located nearby
Ambulance time is 15 minutes

Activity Facilitators carry the following equipment:

- First Aid Kit

Lutanda: Life Changing Experiences

Risk Management Plan

Hazard / Risk Description	Existing Control Measures	Risk Rating		
		Likelihood	Consequence	Risk Rating
Activity Specific – Risk factors specifically associated with activity at Lutanda Yarramundi				
Drowning	<ul style="list-style-type: none"> Participants are required to wear Level 50 PFDs at all times while in the water Activity Facilitators have Bronze Medallion or equivalent Activity operates on flat water Vigilant supervision by Activity Facilitator throughout session Activity Facilitators carry throw lines 	Rare	Catastrophic	Satisfactory
Drifting Off	<ul style="list-style-type: none"> Participants are briefed on how to paddle prior to entering water Boundaries are clearly defined during briefing Activity Facilitator monitors participants throughout the session Activity Facilitators carry tow lines Activity not to be conducted when river is fast flowing 	Unlikely	Minor	Satisfactory
Entrapment Participants trapped in raft or debris in the river	<ul style="list-style-type: none"> Participants briefed on what to do in the event of raft breaking apart Participants are required to wear Level 50 PFDs at all times while in the water Activity Facilitators will assist with removing rafts from water Activity Facilitator will ensure ropes are tied well before raft enters the water to prevent ropes catching Activity Facilitators have Bronze Medallion or equivalent 	Unlikely	Moderate	Satisfactory
Impact Collisions with other craft, water users and solid objects	<ul style="list-style-type: none"> Boundaries are clearly defined in briefing Operations of other users of the river are identified before entering water Participants to enter the water with their rafts separately 	Possible	Minor	Satisfactory
Striking Hit by paddle or a piece of the raft in/out of water	<ul style="list-style-type: none"> Participants briefed on dangers of carrying wood and barrels around while building rafts Participants briefed on dangers of wielding paddles Participants briefed on correct way to hold paddles Participants briefed to be aware if raft falls apart that pieces may cause injury Participants are required to wear Level 50 PFDs at all times while in the water Vigilant supervision by Activity Facilitator throughout the session 	Possible	Minor	Satisfactory
Crushing Fingers crushed/squashed between rafts	<ul style="list-style-type: none"> Participants are warned of the danger and instructed to be careful of fingers 	Unlikely	Minor	Satisfactory
Slip – Trip - Fall When getting in / out of the river edge	<ul style="list-style-type: none"> Participants briefed on entering / exiting water Activity Facilitator assists participants in entering / exit water Participants required to wear correct footwear at all times 	Possible	Minor	Satisfactory
People – Risk factors associated with the people using the activity				
Participant Behaviour Inability or decision to not follow directions or cooperate	<ul style="list-style-type: none"> Clear behaviour expectations set at start of activity sessions Encouraging supportive environment Maintaining supervision Outline consequences of inappropriate behaviour Removal of individual from activity or cancellation of activity 	Unlikely	Major	Satisfactory

Lutanda: Life Changing Experiences

Archery Risk Management Plan – Lutanda Yarramundi

Hazard / Risk Description	Existing Control Measures	Risk Rating		
		Likelihood	Consequence	Risk Rating
Participant Ability Unable to complete activity due to: <ul style="list-style-type: none"> • Fear / Anxiety • Complacency / Overconfidence • Physical Ability 	<ul style="list-style-type: none"> • Supportive environment encouraged • Participants briefed according to age, ability, experience • Participation is based on meeting requirements • Demonstration of understanding and/or skills must be shown prior to undertaking activity • Participants are guided through activity supportively by Activity Facilitator • Activities are challenge by choice - participants are positively challenged but not forced to participate in activity 	Possible	Moderate	Satisfactory
Activity Facilitator Unsafe practices leading to an injury to a participant caused by: <ul style="list-style-type: none"> • Poor supervision by Activity Facilitator 	<ul style="list-style-type: none"> • Activity Facilitators must follow Standard Operating Procedures at all times • Activity Facilitators are trained and signed as competent, by a qualified Activities Instructor. Vigilant supervision required by Activity Facilitators at all times • Communication equipment available readily at activity sessions 	Unlikely	Major	Satisfactory
Group Leader Unsafe practices including: <ul style="list-style-type: none"> • Poor supervision by group leaders 	<ul style="list-style-type: none"> • Groups briefed on requirement to provide supervising adult for participants under 18 years old prior to camp and activities • Activity Facilitators will stop or cancel activity without adequate supervision from Group Leader 	Unlikely	Major	Satisfactory
Observers Injury to... Guests or others observing activity while it is running	<ul style="list-style-type: none"> • Observers not allowed to participate in activity without activity briefing 	Unlikely	Major	Satisfactory
Unsupervised Users Injury to...Guests on site when activity is not running; Members of public accessing camp land (unauthorised)	<ul style="list-style-type: none"> • Groups briefed on not using facilitated activities without Activity Facilitators • Activity equipment locked away when not in use • Equipment not left out after of before activity 	Unlikely	Major	Satisfactory
Equipment – Risk factors associated with the equipment used for the activity				
Equipment Failure Due to improper use, faulty / damaged equipment	<ul style="list-style-type: none"> • Activity Facilitators trained in selection, use, inspection, care & maintenance of activity equipment • Activity Facilitators perform check of equipment prior to each activity • Participants briefed on proper use of equipment • All equipment clearly stored and labelled for activity intended for • Equipment regularly inspected and maintained • Equipment stored, maintained and retired according to manufacturer instructions • Equipment used certified by manufacturer as suitable for use 	Rare	Major	Satisfactory
Environment – Risk factors associated with the environment including weather				
Wind Making it potentially difficult to control raft	<ul style="list-style-type: none"> • Activity Facilitator will assess groups ability to cope with increasingly difficult wind conditions • Activity will be modified / cancelled at discretion of Activity Facilitator • Activity Facilitators will guide participants to shore if dangerous conditions arise while on water 	Possible	Minor	Satisfactory
Dangerous Water Conditions Usually caused by high winds Causing cancellation of activity	<ul style="list-style-type: none"> • Weather forecast and local conditions checked prior to conducting activity • Activity will be cancelled / substituted if conditions are considered dangerous • Alternate arrangements to be made with Activity Manager / Program Coordinator 	Unlikely	Moderate	Satisfactory
Exposure to UV rays	<ul style="list-style-type: none"> • Sun smart strategies are encouraged 	Possible	Minor	Satisfactory

Lutanda: Life Changing Experiences

Archery Risk Management Plan – Lutanda Yarramundi

Hazard / Risk Description	Existing Control Measures	Risk Rating		
		Likelihood	Consequence	Risk Rating
Causing sunburn				
Exposure to Heat Causing dehydration, heat stroke etc.	<ul style="list-style-type: none"> Sun smart strategies are encouraged Participants are encouraged to drink water, carry water bottles Guests are briefed on location of water filling locations on arrival Activities modified / cancelled if necessary or alternative activities arranged 	Unlikely	Moderate	Satisfactory
Cold / Wet Weather Causing hypothermia etc.	<ul style="list-style-type: none"> Weather conditions regularly monitored for adverse conditions Participants briefed on wearing suitable protective clothing Activities modified / cancelled if necessary or alternative activities arranged 	Rare	Moderate	Satisfactory
Lightning Strike	<ul style="list-style-type: none"> Weather conditions regularly monitored for adverse conditions Activities delayed / cancelled during lightning storm, participants moved to safe area Activities modified / cancelled if necessary or alternative activities arranged 	Rare	Catastrophic	Satisfactory
Injury or Allergic Reaction caused by organism	<ul style="list-style-type: none"> Groups briefed on arrival on appropriate actions for sighting/be bitten by snakes Activity area regularly monitored for organisms commonly causing allergic reaction and treated accordingly Suitable medication and first aid to be readily available (user group must provide first aid) Communication equipment readily available Medical assistance within 15 minutes 	Unlikely	Major	Satisfactory
Injury caused by contact with natural features	<ul style="list-style-type: none"> Regular checks of activity area carried out and appropriate maintenance performed (sticks removed etc.) Participants briefed on safe areas 	Unlikely	Minor	Satisfactory

Risk Ratings

This risk assessment is measured according to the following risk ratings:

Likelihood Ratings

Likelihood is the description of the probability and frequency. The likelihood of the risks occurring as outlined in Lutanda Mt Yarramundi risk management plans is determined after the control measures have been implemented.

Score	Description	Broad description of frequency	Time framed description of frequency
1	Rare	The event may occur, but only in highly exceptional circumstances	Not expected to occur for years
2	Unlikely	Could occur at some time	Expected to occur at least annually
3	Possible	Might occur at some time	Expected to occur at least monthly
4	Likely	Will probably occur in most circumstances	Expected to occur at least weekly
5	Almost certain	Is expected to occur in most circumstances	Expected to occur at least daily

Consequence Ratings

The outcome of an event or situation expressed qualitatively or quantitatively, being the human impact, damage to infrastructure, disruption to public or financial loss.

Score	Description	Injury or impact details
1	Insignificant	Little or no injury requiring no medical attention; Minimal impact on environment; Insignificant adjustments to program; Insignificant damage to property, normal wear; Some difficulty in retaining competent staff; Expected running costs incurred
2	Minor	Minor injuries requiring first aid / some medical attention; Minor impact to plants / animals, no disruption to ecosystems; Rescheduling / replacement of program activities to client satisfaction; Damage requiring small repairs, low cost; Some difficulty in attracting, developing, resourcing and retaining competent staff; Minor costs incurred (<\$250)
3	Moderate	Serious injuries requiring hospitalisation / ongoing medical attention; Ecosystem / landscape self repairs within 12mo; Significant disruption / cancellation of program events; Damage requiring moderate repairs or replacement, moderate cost; Significant difficulty in attracting, developing, resourcing and retaining competent staff; Moderate costs incurred (<\$1,000)
4	Major	Injuries that are life threatening or causing long term disability; Ecosystem / landscape self repairs within 36mo; Program disruption causing loss of program; Damage requiring high cost/projects for repair/replacement; Guest experience and program is majorly affected by lack of competent staff; Major costs incurred (<\$15,000)
5	Catastrophic	Fatality; Irrecoverable loss of ecosystem / landscape; Program disruption causing broad loss of reputation; Massive damage, significant replacement of infrastructure required; Programs unable to be fulfilled due to lack of competent staff; Massive costs incurred (>\$15,000)

The consequence of an incident occurring may vary greatly depending on the individual circumstances of each incident.

Example – A student trips and falls – a detailed analysis of falls might show that although falls occur weekly, more serious injuries from falls only occur once or twice a year. In the main most of the other falls have relatively minor outcomes. Therefore the incident could be scored either according to the severity of the actual outcome, or according to the most likely or typical outcome for that type of incident.

Both approaches are valid, however to ensure consistency Lutanda Yarramundi has adopted an approach to record the most likely or typical outcome for all incidents.

Risk Rating Matrix

All identified risks are recorded in the following risk matrix according to likelihood and consequence. The purpose of this matrix is to provide a snapshot of all identified risks and establish the level of risk to determine if further treatment is required.

Likelihood	Consequences				
	1 - Insignificant	2 - Minor	3 - Moderate	4 - Major	5 - Catastrophic
1 - Rare	1	2	3	4	5
2 - Unlikely	2	4	6	8	10
3 - Possible	3	6	9	12	15
4 - Likely	4	8	12	16	20
5 - Almost certain	5	10	15	20	25

Risk Treatment

1-4 Low Risk <ul style="list-style-type: none"> Risk does not generally need to be managed any further (current controls are adequate), however the risk needs to be monitored for changes in circumstances and current control effectiveness. Risk generally may be accepted. 	10 -14 High Risk <ul style="list-style-type: none"> Risk is unacceptable, risks must be further treated or removed to bring rating to medium Risks are to be re-assessed by Activities Manager
5-9 Medium Risk <ul style="list-style-type: none"> Risk needs to be regularly monitored for any changes and control/treatment effectiveness. Risk may be accepted after consideration. 	15+ Extreme Risk <ul style="list-style-type: none"> Unacceptable risk, urgent attention is required to treat or remove risks Management to consider elimination of activity

Risk Assessment Conducted by: *Jemima Robinson* Position: *Activities and Hosting Manager, Lutanda Mt Victoria*
 Date of Risk Assessment: *27th January 2016* Date of Review: *January 2017*
 Document Revision: *Version 1*
